PROJECTS

Uzhavan [All under one roof for farmers]

Domain : Web Application , Machine Learning

Utilized technologies : Reactjs , JavaScript , MongoDB, CSS3 , python ,flask ,Bootstrap

Description :Developed "Uzhavan" web app for farmers with React, MongoDB, and Flask, integrating machine learning for agriculture

Business Card Development Platform [Freelancing]

Domain : Web Application

Utilized technologies : Vite , ReactJs, Tailwind Css , Express Js , Moongose, Mongo DB

Description :Developed "Uzhavan" web app for farmers with React, MongoDB, and Flask, integrating machine learning for agriculture

Dwrites [Blog App]

Domain : Web Application

Utilized technologies : Vite , ReactJs, Tailwind Css , Express Js , Moongose, Mongo DB

Description :Developed "Uzhavan" web app for farmers with React, MongoDB, and Flask, integrating machine learning for agriculture

TECHNICAL SKILLS

Programming Language : ● JavaScript

Front-End Languages : ● HTML5 ● CSS3

Frame-Work ● Tailwind CSS ● ExpressJs

Back-End ● NodeJs

Library : ● ReactJs ● Redux

DataBase : ● Mongo DB Atlas

TOOLS

Front-End Tools : ● Figma ● Codux ● Fire-Base ● Framer

Other Tools : ● GitHub ● Postman

Automation Tools: ● Puppeteer

Software Framework: ● Docker

INTERNSHIP

Global Knowledge

- Completed a one-month intensive offline internship focused on the latest advancements in technology such as s data science, and machine learning
- Acquired valuable insights and practical skills to stay abreast of global trends and enhance proficiency in the rapidly evolving tech landscape

Saptang Labs Pvt. Limited - Chennai [January 2024 – Present]

- Developed and maintained end-to-end Telegram message monitoring solutions, ensuring real-time tracking, seamless integration, and robust data analysis.
- Engineered and integrated a translation model for diverse text content, ensuring accurate and efficient language conversion across various platforms

AWARDS

- Secured 2nd Runner up in Mini - Project Expo conducted in Sri Eshwar college of Engineering
- Secured a top 3 position on given theme in the national-level hackathon organized by GNU in Hyderabad
- I achieved first place in the EWL competition organized by Gyanmatrix for front-end development.

ROLES AND RESPONSIBILITIES

- **Software Developer** – Crafting intuitive and responsive user interfaces for web applications
- **Freelance Front-End Developer** – creating intuitive, responsive web interfaces. Expertise in HTML, CSS, and JavaScript for seamless user experiences
- **Placement Coordinator** – dedicated to fostering student career development through proper coordination

EDUCATION

B . Tech Artificial Intelligenceand data science		Aug 27-2021 - Present
Sri Eshwar College of Engineering	**CGPA-7.1**	
Higher Secondary School Certificate		2019-2021
Plato's Academy Higher Secondary School	**84%**	
Secondary School Certificate		2018-2019
Subash Matric and Higher Secondary School	**74%**	

FUTURE ENHANCEMENT

● **Backend Development** : Mastering backend tech to create robust, scalable applications and efficient APIs with **.NET** and **Flask**

● **DevOps :** Embracing DevOps to automate and streamline development and deployment for seamless delivery

● **Frontend Development:** Building intuitive, responsive UIs with React. Currently learning **Next.js** for enhanced performance and server-side rendering

INTEREST

● Sky Watching
● Reading Books
● Travelling
● Music
